CEP Social Assistants Cheat Sheet

I want to:	*I need to say:*
See the weather	**"Hey Google, how is the weather?"**
Play music	**"Hey Google, play some music"**
Play a specific song	**"Hey Google, play Blue Suede Shoes by Elvis"**
See my Calendar	**"Hey Google, what's on my calendar?"**
Remind me to do BrainHQ	**"Hey Google, remind me to do BrainHQ in 15 minutes"**
Remind me to call my family	**"Hey Google, remind me to call my son in an hour"**

What else can my CA do? :

Intercom : You can be anywhere in the world, and use your Google Home App to connect to the Google Home Hub in your house and relay a message via the speaker

Routines : Routines enable you to link multiple actions with one command. For example, we could program it so that all you have to say is "Hey Google, good morning", and it would tell you the weather, tell you what is on your calendar, and give you the daily headlines.

Example routines are "Hey Google, Good morning", "Hey Google,Bedtime", "Hey Google, Leaving Home", "Hey Google, I'm Home", "Hey Google, I'm commuting home"
You can customize the routines at any time from your phone and, set up new routine

Lists : You can create lists and add to them with your voice. For example "Hey Google, add blueberries to my *shopping list*". To hear what's on your list, you can ask "Hey Google, what's on my *shopping list?"* Note: in this case, the list is called *shopping list*

For your privacy, please be aware:
1) Avoid mentioning the real name of a medication to Google Home. Instead, use a code word like "remind me to take the blue pill" or "remind me to take my morning medicine".

2) Avoid mentioning sensitive personal information to the Google Home such as scheduling a reminder for a specific medical procedure. Instead, set the reminder with some information about your doctor or the location to protect your privacy.
